Professional Summary

Aspiring Robotics Engineer with a relentless curiosity for how things work. Beyond my academic studies in AI and Robotics, I am a dedicated hobbyist who loves analyzing and reverse engineering existing technologies. This practice has sharpened my eye for detail and provided me with a deep appreciation for high quality product design. I am eager to apply this mindset along with my skills in MATLAB, Python, and hardware prototyping to create the next generation of engineering solutions.

EDUCATION

University of Hertfordshire, Hatfield, United kingdom

BEng (Hons) Robotics and Artificial Intelligence 2nd year student

Secondary School

St' Joesph's College Colombo 10 Negombo Branch

2009 -2022

PROJECTS

Project Modulax (2025)

Create a Smart LED light that hot swapable modular LED Ceiling light. That is sustainable and easy to control using IOT

Built a battel bot (2024)

Built a battel bot that can withstand a 15kg opponent robot with clever compact hardware design integration.

Micromouse Robot (2024)

Create an autonomous micromouse robot using Arduino nano, N20 Gear motors and use the flood fill algorithm to solve the maze. Successfully participated in SLIIT Robofest.

Embedded Systems Project (2025) – Smart Fan Controller

Designed and programmed a smart fan controller that change the fan speed according to environmental temperature with integrate with mini display and 3d printed enclosure.

Hybrid Robotics Architecture (2025) – Webots

Implemented a neural-network enhanced subsumption system for smoother behavior, faster task completion and improved energy efficiency.

AI & Robotics Project (2025) – Webot

Develop a smart library assistant robot that do book fetching and keeping . That show case the homeostatic functions

Bio-Inspired Robot (2026) – A four legged robot

Design a bio inspired robot with locomotion and image recognition, This Robot can identify the threats and light intensity in each environment.

VOLUNTARY EXPERIENCE

Assistant Secretary - IET -Institute of Engineering Technology

Organized events at the university

EXTRA-CURRICULAR ACTIVITIES

Assistant Secretary at IET on campus (SLTMNIT)

Vice Chairman -Robotics & Electronic Society (SLTMNIT)

AWARDS AND ACHIEVEMENTS

Global Nominee - NASA Space Apps Challenge Hackathon

Second Runner Up – Hack X National Hackathon Series by Kelaniya University

SKILLS AND INTERESTS

Languages	:English (fluent),Sinhala(Fluent),German (beginner)
Software	: Microsoft Office, GIT, Project Management softwares
Programming Languages	: C, Arduino, Python, MATLAB
3D Designs	: Fusion 360, Blender
Circuit Design	: Altium, Proteus, Easy Eda ,Ki cad, Fusion 360 electronic
Simulation	: Webots, ROS

Professional Skills

Digital Proficiency, Ethics, Diversity and Sustainability,Resilience,Interpersonal Skills,Enterprise and Entrepreneurship ,Adaptability, Flexibility,Teamwork,Critical thinking

REFEREES

Eng .Hasalanka Nagahawaththa,
B.Sc. Eng. (Ruhuna), Mphil(Reading-Ruhuna) AM-
